SHOWA 8814

The SHOWA 8814 heat-resistant gloves are designed to withstand temperatures up to 500°F/260°C. Even after multiple washings, the 8814 maintains its heat-protective qualities. The textured surface of the neoprene coating provides superior tactile dexterity. When working in damp or greasy environments, the impermeable glove keeps hands protected. Easy donning and doffing makes the glove easy to remove in an emergency.

BENEFITS

- Impermeable
- Machine washable
- Increased dexterity
- Easy donning and doffing
- Heat-resistant

INDUSTRIES

Food

Mining

FEATURES

- Rough grip
- Fully-coated neoprene

HAZARDS

Heat

USER INSTRUCTIONS

Gloves provide protection from chemical and mechanical hazards shown. Do not use gloves that show signs of wear. If required, cleanse outer surface of glove with running water. Discard used gloves in compliance with local regulations. Do not wear gloves when there is a risk of entanglement by moving parts of machines.

DISCLAIMER

The descriptions, characteristics, applications and photos are given for information purposes and do not constitute a contractual commitment. The manufacturer reserves the right to make any modifications it deems necessary.
