PRODUCT CHARACTERISTICS

- Voltgard® Two Pocket Glove and Protector Combo Bags contain two layered pockets in one bag
- Both a pair of gloves and protectors can be conveniently stored together in one bag
- Glove bags help prolong the life of rubber goods by protecting them from weather extremes, heat and other adverse conditions
- Manufactured using cotton canvas duck material to provide durability and feature self-hemmed seams with two metal quick-release snap buttons for easy opening and closure
- A strong metal spring hook secured by a three-piece grain cowhide leather reinforcing patch (double riveted) on the back of the bags allows bags to be clipped to almost anything
- Double brass grommets at the base of the bags for aid in circulation and drainage
- Machine washable

APPLICATIONS

Ideal for use by electrical utility workers, power and communication linemen, electrical contractors, electrical field service technicians, telecommunications companies, cable television operators, auto manufacturing/repair service workers, municipalities, first responders, energized machine operators and industrial plant and facility maintenance technicians or anywhere there is exposure to electrical shock hazards. Please note, glove and protector combo bags are intended for product storage only and provide no electrical safety protection by themselves.

QUALITY CONTROL

Voltgard® Glove and Protector Combo Bags are 100% inspected for visual defects, and statistically-valid random samples of all production are tested for physical performance to ensure compliance with generally-accepted standards for first-quality glove and protector combo bags as well as the product specifications contained herein. Second-grade, irregular or defective glove and protector combo bags not meeting the agreed quality levels will be destroyed.
