Fall Protection

X200

3M™ DBI-SALA® ExoFit™ X-Series Harnesses

Gear up with confidence, quality, and performance.

The 3M™ DBI-SALA® ExoFit™ X200 is designed with high-quality components that have been developed to enhance the harnesses safety, fit, and functionality while working at height on your job site. The X200 comfort harness is built with 6,000 lb polyester webbing, nylon/polyester hybrid comfort padding and robust alloy steel hardware. Dorsal D-ring connections are faster and easier with the stand-up back D-ring. The anti-slide back D-ring plate design helps reduce dorsal D-ring slide and enables a convenient adapter location for connecting personal SRLs. There are also locking torso-adjustment and quick-connect buckle options available to help your team maintain a safe and comfortable harness fit.
