PRODUCT CHARACTERISTICS

- Coated aprons provide liquid proof protection against caustic potash, amyl and butyl acetate, animal and fish fatty acids, coal tar solvents, and the following acids: lactic, formic, carbolic, citric, acetic and tannic
- Attached grommets provide extra durability
- Available in several different sizes, colors, weights and packaging configurations to meet a variety of coated apron safety needs

APPLICATIONS

Ideal for use in food handling and catering, food preparation and processing, food service, janitorial and maintenance applications.

QUALITY CONTROL

Enviro-Gard® Aprons are 100% inspected for visual defects, and statistically-valid random samples of all production are tested for physical performance to assure compliance with generally-accepted standards for first-quality aprons as well as the product specifications contained herein. Second-grade, irregular or defective aprons not meeting the agreed quality levels will be destroyed.
