PRODUCT DESCRIPTION

41" (RESCUE-6T)
43" (RESCUE-8T)
RETRACTED

6' (RESCUE-6T)
8' (RESCUE-8T)
EXTENDED

PICTURED:
RESCUE-8T

Part Number:	See Below
Product Name:	Saf-T-Gard® Voltgard® Telescopic Insulated Rescue Body Hook
Product Category:	Electrical Safety – Hot Sticks, Hooks & Accessories
Material(s):	Hook: Heat-Treated Steel Dipped in Vinyl Handle: Non-Conductive Fiberglass
Color(s):	Hook: Black Handle: Yellow with Hi-Viz Yellow Top
Length:	Fully Extended: 6' (RESCUE-6T) / 8' (RESCUE-8T) Fully Retracted: 41" (RESCUE-6T) / 43" (RESCUE-8T)
Hook Opening:	18"
Diameter:	Hook: 1" Handle: 1 3/4" (Triangular)
Unit of Measure (UOM):	Each
Packaging:	Ships in a 43" x 20" x 2" Carton

AVAILABLE STYLES

Item #	Description	Length
RESCUE-6T	Telescopic Insulated Rescue Body Hook	Fully Extended: 6' Fully Retracted: 41"
RESCUE-8T	Telescopic Insulated Rescue Body Hook	Fully Extended: 8' Fully Retracted: 43"

PRODUCT CHARACTERISTICS

- The Saf-T-Gard® Voltgard® Telescopic Insulated Rescue Body Hook is coated and heat-treated with an 18" opening, mounted on either a 6' (RESCUE-6T) or 8' (RESCUE-8T) telescopic fiberglass handle for emergency rescue of injured personnel from hazardous areas
- Constructed using a thicker, sturdier hook than most other competitive models, which is less likely to break off from the handle
- The unique telescopic handle design collapses to a compact overall length of 41" (RESCUE-6T) or 43" (RESCUE-8T) to conveniently fit inside a standard shipping carton (43" x 20" x 2") for ease of transportation/shipping
- Compact, retractable size ships for less than \$10, delivering tremendous value over other fixed-length 6' rescue hooks that can cost around \$20 to ship and 8' fixed-length rescue hooks that can cost more than \$100 to ship
- Hi-Viz yellow portion at the top of the telescopic handle provides added visibility
- "No-Twist" triangular design allows the telescopic handle to remain in a locked position when fully retracted
- Designed to comply with OSHA 1910.269(j) for the construction of live line tools and OSHA 1926.957 for the use of live line tools
- All sections must be fully extended, and all lock buttons must be fully locked before utilizing to ensure correct usage
- Each section of the handle can be individually removed for operation, cleaning and repair, by depressing the lock button from its locked position and sliding the sections apart

APPLICATIONS

Intended for use in emergency rescue of injured personnel from hazardous areas, including (but not limited to) confined spaces, in vaults or just near electrical cabinets and switch gear. Also applicable for use in first aid rescue for public utilities, fire and emergency response public safety departments, emergency response units for electric vehicles, auto dealerships servicing electric vehicles, and public swimming pools.

FUNCTIONAL PERFORMANCE

VOLTGARD® TELESCOPIC INSULATED RESCUE BODY HOOKS MEET OSHA 1910.269(j) AND OSHA 1926.957 STANDARDS, AS APPLICABLE

Warning – This tool is NOT intended to be used as a device to raise conductive equipment such as electrical cords, measuring tapes or antennas to elevated positions. Serious or FATAL shock may occur if conductive accessories come into contact with electrical power lines. All sections and lock buttons must be fully extended and fully locked when tool is in use. Depress lock button and remove bottom sections not required for use.

QUALITY CONTROL

Voltgard® Telescopic Insulated Rescue Body Hooks are 100% inspected for visual defects, and statistically-valid random samples of all production are tested for physical performance to ensure compliance with generally-accepted standards for first-quality telescopic insulated rescue body hooks as well as the product specifications contained herein. Second-grade, irregular or defective telescopic insulated rescue body hooks not meeting the agreed quality levels will be destroyed.
